**Information Science and Technologies of the Italian National Research Council" (ISTI-CNR), IT**

Donatella Castelli is a Senior Researcher working at (ISTI-CNR) since 1988. She graduated in Computer Science at the Dept. of Computer Science of the University of Pisa & was a researcher for 2 years before joining ISTI-CNR Networked Multimedia Information Systems. Since 1996 she has been the principal investigator of several EU & National funded projects on digital libraries with extensive experience in this domain. In particular, she is currently the scientific coordinator of the D4Science project, whose objective is to deploy a production digital library infrastructure on grid-enabled technologies addressing the needs of scientific communities affiliated with the broad disciplines of Environmental Monitoring and Fishery and Aquaculture Resource Management. She is technical coordinator of DRIVER II - creating a European infrastructure of institutional repositories. Principal investigator of DELOS NoE on Digital Libraries activity dedicated to the definition of a Reference Model for digital libraries. Her current research interests include digital library architectures and infrastructures, information object modeling and interoperability.
